

# Take the Miniature Treasure Hunt Challenge!

## You will need:

a very small container – an empty match box is ideal, a raisin box or any tiny container will do, the smaller it is, the greater the challenge! (You could even make a small box if you wish)

Decorate your container, if you wish, with crayons or pens.

## What to do:

1. Take your container outside with you into the woods, school grounds or garden.
2. Fill it with as many different natural things as you can find – maybe a pebble, a leaf, a feather, a blade of grass, a twig etc. They will need to be tiny to fit in so you will need to look closely.

**Remember not to take anything that is still living – plant or creature! (Unless they are cultivated or there are plenty and you would not be harming the species)**

3. When you have finished, count out how many things you have found.
4. You can make this a competition if everyone taking part has the same size of container and a time limit of maybe 15 minutes is given! Or try it again in a different place.
